le Was Used to Holding Up a Bank When He Wanted Money-Old Methods Superseded.

When civilization reached Pine Hill City, a bank was established, and one of the first customers was old man Johnson. A few days later he wanted money, and entered the place with a gun in his hand, relates the Boston

"Want some money to-day?" quer-ried the president. "Well, it's ready for you.'

"Say, I don't understand," exclaimed the old man, as he backed off. "I'm here to hold this bank up for \$30."

"But you don't have to. Just sign this check, and I'll hand over your "And I don't yell or shoot?"

"And the sheriff don't come after

"No. Put your name to this." "I can't do it—can't do it, nohow," said the old man, with a choke in "If that's the new way of doin' things, I'm out of it. want my money, but I want it in the

"Well, have it in the old way, then." The old man tramped forward to the cashier's window, rested the muzzle of his gun on the ledge and yelled

"Come down, or you are a dead "Certainly. Here's thirty."

"And-and is that all there is to

"That's, all." "Then I'll be hanged if I want it," he said, and he threw the money back and went outdoors and sat down on a barrel of sugar in front

"HARDENING" OF CHILDREN.

of a grocery, and shed tears.

Few Helpful Rules Given-III Re sults Apt to Follow Unwise Measures Sometimes Adopted.

Hecker is outspoken in his objections to the methods pursued in the so-called "hardening" of children by the means of cold douches or baths. As a rule, children thus treated are more susceptible to nasal catarrhs. throat affections, bronchitis and pulmonary inflammations than those who have not been subjected to the "hardening" process, says the New York Medical Record. Furthermore, such measures frequently give rise to pronounced anaemia and various disorders of the nervous system. Children so "hardened" are especially prone to acute and chronic intestinal

While in healthy children a properly conducted "hardening" process is often of advantage, it must be remembered that there are no hard and fast rules, and that every case must treated according to the individual indications. The fundamental principles of a proper "hardening" system are as follows: (1) Gradual acclimation to the air of the room; (2) gradual acclimation to outdoor air; (3) gradual acclimation to cold water; (4) suitable clothing-varied according to the weather and time of year. Great care should be observed in acclimating the child to cold water, and the effects of the same should be careonce suspended on the first appearance of any unfavorable symptoms.

On no account should any of the "hardening" measures be commenced until the nursing period is passed, and in all cases the process should be one of gradual advancement.

Suicide Prevented.

Chesinut Pudding. Boil one pint of the large Spanish chestnuts-remove the shells and thin skin-press through a sieve or put through the meat chopper. Cream one-half cup of butter with one-half cup of sugar, add to this the wellbeaten yolks of three eggs, one cup of milk, one-half cup of bread crumbs, and the grated rind of one lemon. Mix this all thoroughly together with the chestnuts, then add the beaten whites of the eggs, place in a buttered mold and steam for about one hour. Serve with custard sauce or whipped cream.-Washington Star.

Meat Balls. One bowl finely chopped cold meat, one cup mashed potato, a little onion juice (scraped or grated onion), gravy or milk to mold, season with salt and pepper to taste.—Beston Globe.
